

The Bayer

Sorghum Crop Protection Portfolio

Our portfolio of innovative solutions can help you maximize yield and performance potential from start to finish.

	Product	Group(s) [†]	Use Rate
Seed Treatments	 <p>Gaucho 600</p> <p>Controls insects that spread viruses which reduce stand, forage production and yield potential</p>	4A	6.4 fl oz/100 lb of seed
Herbicides	 <p>Degree Xtra</p> <p>As soil temperature rises, patented temperature-release technology delivers just the right amount of weed control</p>	5 15	2.0 to 3.7 qt/A
	 <p>Huskie</p> <p>A simple, flexible tool for control of a wide spectrum of broadleaf weeds</p>	6 27	12.8 to 16 fl oz/A
	 <p>HuskieFX</p> <p>Combines three modes of action for enhanced performance against kochia and other broadleaf weeds with built-in resistance management</p>	4 6 27	15 to 19 fl oz/A
	 <p>Roundup PowerMAX 3 HERBICIDE</p> <p>Contains a unique surfactant blend with a higher concentration of glyphosate per gallon</p>	9	20-30 fl oz/A
	 <p>RT3 Powered by Roundup Technology</p> <p>Part of the Roundup Portfolio of products, RT3[®] herbicide is approved for pre-planting and fall burndown applications</p>	9	32 fl oz/A
	 <p>WARRANT HERBICIDE</p> <p>Acetochlor-based pre-emergence and postemergence residual herbicide with microencapsulation technology</p>	15	1.5 to 3 qt/A
Insecticide	 <p>SIVANTO prime</p> <p>Precisely targets harmful sucking pests, such as aphids, while having minimal impact to beneficial insects</p>	4D	7 to 14 fl oz/A*

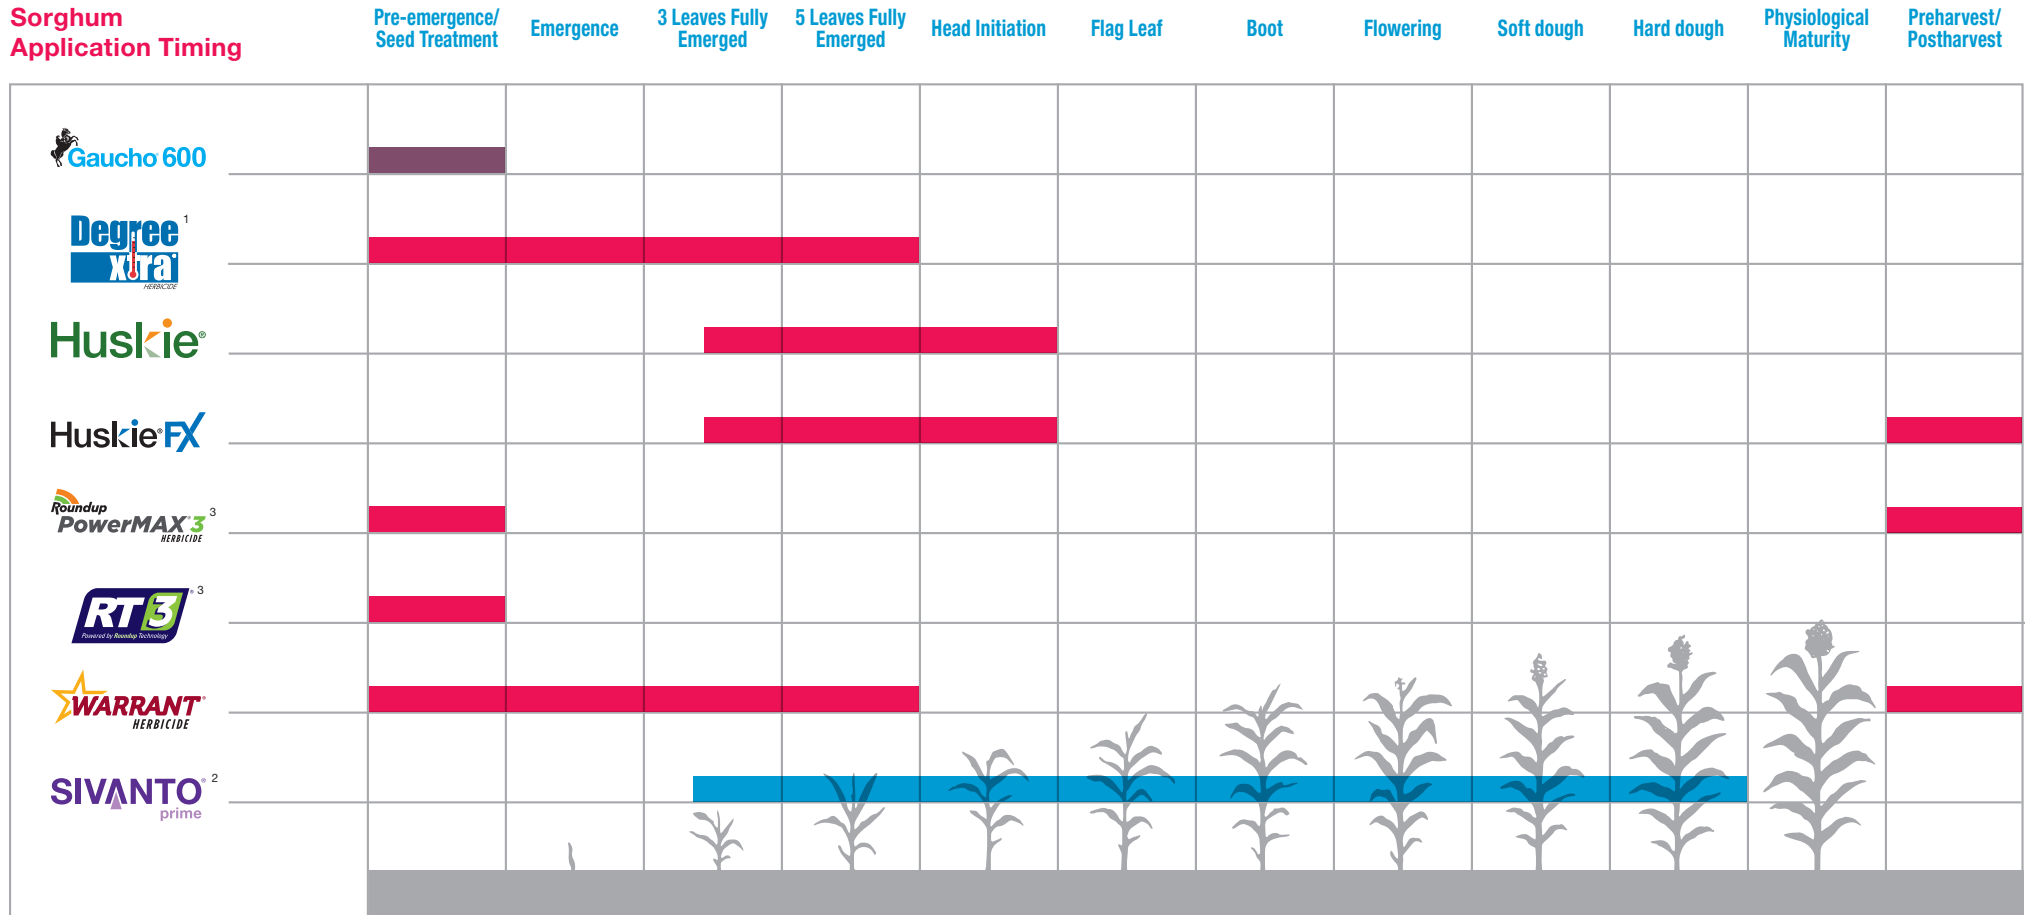

*2(ee) for control of the sugarcane aphid at lower rates in the following states: AR, KS, NE, OK, TX.

[†]Chemical mode of action Group. Please consult product labels for more information. Not all products are registered in all states and may be subject to use restrictions. Please check with local state regulatory agency for registration status.

[†]For Roundup PowerMAX[®] 3 herbicide and RT3[®] herbicide applications for wheat, apply after the hard-dough stage when grain moisture is 30 percent or less. Restrictions: Do not apply more than 22 fl oz of any of these products per acre for preharvest application. Allow a minimum of 7 days between application and harvest or grazing.

For more information on herbicide group numbers and site-of-action options, visit IWillTakeAction.com

Sorghum Application Timing

¹ Acetochlor products may be applied up to 11" grain sorghum.

² See 24(c) label for 4 to 7 fl oz/A, 7 to 14 day PHI applications in the following states: AR, KS, NE, OK and TX.

³For Roundup PowerMAX[®] 3 herbicide and RT3[®] herbicide applications for wheat, apply after the hard-dough stage when grain moisture is 30 percent or less. Restrictions: Do not apply more than 22 fl oz of any of these products per acre for preharvest application. Allow a minimum of 7 days between application and harvest or grazing.
